

Our 7" Round Headlights Have Evolved Yet Again!

Chrome DOT Version

Black ECE Version

Introducing the most powerful DOT-compliant and ECE-compliant headlight ever made! The all new Model 8700 Evolution 2 builds upon the success of the original Model 8700 Evolution and offers improved light output, a sleek new look, and the same simple plug-and-play installation—all for a lower cost!

The Model 8700 Evolution 2 combines the latest in LED technology and circuit design to create a beam pattern that's superior to anything else on the market today! The high beam has been outfitted with the addition of "comfort lighting" which illuminates an even larger portion of the road than ever before!

The Model 8700 Evolution 2 features both high and low beam functions. The tough die-cast aluminum housing, hardcoated polycarbonate lens, solid state LEDs, and superior beam pattern make the Model 8700 Evolution 2 perfect for use both on- and off-road.

PRODUCT LAUNCH SCHEDULE

September 17: Preliminary Product Spec Sheet available to Reps

October 1: Product is available for sale, Social Media & Press Release Announcement, Spec Sheet, Landing Page, and Feature Button live on www.jwspeaker.com.

There will be ECE-specific and DOT-specific brochures. The ECE version (Part # 9900401) will only be available online. The DOT version (Part # 9900391) will be available online and in physical form on our B2B website: www.jwspeakerecommerce.com/PublicStore/b2b

Electronic copies of both versions will be sent sometime before the marketing launch date.

| Pattern | Inner Bezel | Lens Material | Voltage | Package Qty. | Part # |
